

REAL METHOD CONTEXT

```
public void mouseDragged(WidgetMouseEvent e, ...)
{
    findPoints(e.getPoint(), e.isShiftDown());
    int <id> [] = new int[points.length], ...;
    for (int i = 0; i < points.length; i++)
    {
        x[i] = (int) points[i].x;
        y[i] = (int) points[i].y;
    }
    view.drawDraggedShape(new Polygon(x, y, ...));
}
```
